Objective

Currently, I'm majoring in Computer Science and earning a Full-Stack Development certification program. I enjoy the challenge of learning new topics and better myself everyday. While, I don't have job experience's in my field, I always willing to learn and willing to work for free, if must. My main focus right now is to become a Full-Stack Developer, but also free to work on another job positions.

Education

<u>B.S., Computer Science</u> <u>& Full-Stack Develop Certfi</u>	Indiana University Indianapolis, USA Advisor: Carlos Zapata	January 2024 – May 2028
---	--	----------------------------

Employment

<u>First-Year Researcher</u> , Indianapolis, IN, USA <i>1RIP Program - Internship</i>	August 2025 – Present
--	-----------------------

- Collaborating with faculty and peers on computational research projects
- Applied programming, data analysis, and problem-solving skills
- Gained experience working with research workflows, documentation, and iterative experimentation

<u>Utilities Locator</u> , Indianapolis, IN, USA <i>USIC</i>	February 2023 – July 2025
---	---------------------------

- Marking underground lines (electric, gas, telecom, water, sewer)
- Documenting work with photos and communicating with excavators
- Work outdoors in various conditions and ensuring public safety
- Gains hands-on experience in the field.

Technical Skills

- *Front-End:* HTM, CSS, JavaScript
- *Programming Languages:* Python, C++, C#, C, java
- *Research Skills:* Data Anaysis, Problem Solving, Communication, Leadership

Passions and Hobbies

- *Creating my own Operator System:* Ever since I switched to Linux as my main laptop, I learn how Linux operators and function by installing “Linux From Scratch” where you have to build your own Linux system from source code, rather than using a pre-compiled distribution. Now, I’m currently working on building my own OS from scratch. So far, I have completed building my own programming language, it has all the basic needs for building a OS, but I still have a lot work to be done.
- *Creating Websites:* Recently, I had completed an Intro to Front-End Development course in IUI. Since then, I have been practicing on my skills with HTML, CSS, and JavaScript by creating websites.
